

Hi-Reliability Connectorized Isolators and Circulators for Space Flight and Military Aerospace Applications

DiTom Microwave has been manufacturing high quality connectorized isolators and circulators in California, USA for over 30 years. In addition to COTS and TVAC qualified products, we serve the space flight and military aerospace industries. We have consistently provided industry leading customer service, delivery times, and quality product while shipping thousands of units to our customers.

DiTom Microwave's Core Capabilities

Manufacturer of Connectorized Isolators and Circulators
Frequency range: 350MHz – 43.5GHz

Connector Options: Type-N, SMA, K, 2.4mm (Any gender, any configuration)

Unique SCDs generated for all new PNs

We will provide a single document containing all mechanical, electrical, material, and testing details

Rapid Prototyping In-House

We can provide prototypes in as quick as 1 week depending on design using rapid prototyping

Solidworks and Xfdtd Software In-House
We can provide 3D solid body and EM models

Industry Leading Delivery Times

We deliver in as few as 2 weeks for engineering models, 4 weeks for flight models with testing

Full Environmental Testing On-Site

Thermal Vacuum Chamber

Automatic Temp/Humidity/Altitude Chamber

Electrodynamic Shaker

Static Thermal Shock Chambers

EMI Test Bench
