RFMW Ltd. and Frontier Electronics Announce Distribution Agreement

1/19/2015 – San Jose, California and Simi Valley, CA: [RFMW Ltd.](http://www.RFMW.com) and Frontier Electronics, a world leader in the manufacture of passive components, today announced a worldwide distribution agreement effective January, 19, 2015. Frontier Electronics has one of the most comprehensive and all inclusive passive component offerings in the industry. Frontier Electronics manufactures magnetics, MLCCs, IPCs, and diodes for RF and power applications. RFMW Ltd. is a specialized distributor providing customers and suppliers with focused distribution of RF and microwave components as well as specialized component-engineering support.

Per the new distribution agreement, RFMW will stock, distribute and provide application engineering support for Frontier Electronics broad product portfolio, including their new 5SQ series of tunable inductors

“Partnering with RFMW is a giant leap in the right direction to support Frontier’s rapidly growing customer base. The technical expertise of RFMW’s sales team makes them the ideal distributor to handle our 5SQ series of High-Q Tunable Inductors.” said Dean Marcum, Global Sales Manager for Frontier Electronics. “Our 5SQ series is allowing customers to adjust and/or tune the inductance of high frequency RF circuits. This, in turn, has greatly increased the customers’ yield.”

According to Steve Takaki, Vice President of RFMW, Ltd., “along with their breadth of product, we chose Frontier Electronics because they are a true factory. They make their own devices and even provide raw materials. Many suppliers of passive devices similar to Frontier's either purchase or private label parts from various factories. That limits their innovation and increases their costs. Frontier’s in-house design team and captive manufacturing resources provide superior performance while lowering customer costs”

About Frontier Electronics

Founded in 1972, Frontier Electronics Corporation has become a world leader in the design and manufacture of passive components. Our Sales, Customer Service, Engineering and Logistics teams are dedicated to exceeding our customers’ expectations. Our R&D teams continually develop new passive component product offerings to re-enforce our company motto: “Designing the Cutting Edge”. For more information on Frontier Electronics, visit their website at www.frontierusa.com or contact them at frontiersales@frontierusa.com.
