RFMW Ltd. and Scintera Networks, Inc. Announce Worldwide Distribution Agreement

7/1/2013 – San Jose, California: [RFMW Ltd.](#) and [Scintera Networks](#), Inc. today announced a worldwide distribution agreement effective June 11, 2013. Scintera Networks, a privately held company, is a leading provider of mixed signal semiconductors for wireless communications. RFMW Ltd. is a specialized distributor providing customers and suppliers with focused distribution of RF and microwave components as well as specialized component-engineering support.

According to the agreement, RFMW will distribute Scintera's portfolio of RF power amplifier linearizers (RFPAL) to support a broad range of customers serving markets including cellular infrastructure, microwave point-to-point, digital terrestrial broadcast, and many other general applications requiring RF linearization.

"We are pleased to have RFMW as a distribution channel for our products" said Davin Lee, chief executive officer of Scintera. "Scintera has established a strong base of customers who rely on our PA linearization products. RFMW's extensive portfolio of RF power amplifiers, transceiver and general RF components coupled with their component engineering and product management skills will provide the complementary solutions and support to help expand our customer base even further."

According to Joel Levine, President and CEO of RFMW, "Many of our customers are either already using or presently evaluating Scintera's RF predistortion linearizer technology. Since RFMW supports a large number of RF and microwave amplifier customers, including commercial infrastructure, small cell and point-to-point radios, to military radio and Land Mobile Radio (LMR), these products will fill a gap in our portfolio to enable the rapid development of low cost, low power consumption and high performance linear transmitters necessary for today's radio networks."

About Scintera

Scintera is an industry leader in delivering high performance, compact and very low-power system-on-chip solutions to measure, modify and monitor RF signals and systems. The company's programmable analog signal processing architecture effectively combines digital programmability with the simplicity, small size and low power consumption of analog circuit processing. The first products to leverage this innovative architecture are its family of adaptive

[RF predistortion linearizers](#). Scintera is privately held and is headquartered in Sunnyvale, California. For further information, please visit www.scintera.com.

About RFMW

RFMW Ltd. is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.
