RFMW, Ltd. and Sunny Electronics Announce Distribution Agreement

San Jose, CA and Tustin, CA, – Sept 4, 2013 – RFMW Ltd. and Sunny Electronics Corp. USA, a world leader in the manufacture of frequency control devices, today announced a worldwide distribution agreement effective September 3, 2013. Sunny Electronics offers the most comprehensive line of frequency control devices in the industry, supplying products from tuning fork to extremely high end-voltage/temperature controlled crystal oscillators. RFMW Ltd. is a specialized distributor providing customers and suppliers with focused distribution of RF and microwave components as well as specialized component-engineering support.

Per the new distribution agreement, RFMW will stock, distribute and provide application engineering support for Sunny Electronics broad product portfolio, including their new FastClock™ series of clock oscillators (XO) and voltage controlled oscillators (VCXO).

“RFMW’s large customer base supported by their technically adept sales team makes them the ideal distributor to handle the Sunny Electronics crystal oscillator products.” said Dan Lee, Director of Business Development for Sunny Electronics. “Our new FastClock XOs and VCXOs use state-of-the-art, factory configurable silicon technology to provide high performance, customer specific devices in less than 5 days.”

According to Steve Takaki, Vice President of RFMW, Ltd., “the Sunny FastClock oscillators offer phase jitter performance equivalent or better than some fixed frequency crystals. We see this as a big benefit to our customers on tight time schedules who currently wait 6 to 8 weeks for a crystal based solution or must choose a quick-turn but inferior performance programmable solution. Sunny Electronics offers both performance and quick-turn with the FastClock series. Our immediate goal is introducing customers to FastClock and then supporting production orders with either FastClock or a fixed frequency oscillator.”

About Sunny Electronics Corp. USA

Founded in 1966, Sunny Electronics Corporation has become the world largest manufacturer of Frequency Control Devices. Since then, we have developed into a service oriented company with very knowledgeable management team which includes dedicated sales, production, engineering and R&D staff committed to total customer satisfaction. From tuning fork crystals to extremely high end-voltage/temperature controlled crystal oscillators, Sunny Electronics Corporation offers the most comprehensive line of frequency control devices in the industry. Sunny Electronics Corporation is committed to aggressive research and development allowing us to stay at the fore front of leading edge technology in the frequency control industry. Our motto is “Provide the best quality, price, and delivery to satisfy customers”. Since the foundation, our goal has always been to exceed customers’ expectations. Sunny Electronics Corporation is publically traded on the Korean Stock Exchange: KOPSI - Sunny Electronics Corp. (004770.KS)

About RFMW

RFMW Ltd. is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.
